Renewable Energy Asia Fund II

Investing in clean energy projects in Southeast Asia

The regional private equity fund Renewable Energy Asia Fund II (REAF II) is managed by the London and Singapore-based company Berkeley Energy. The REAF II fund invests in renewable energy infrastructures in Southeast Asia.

The fund mainly targets investments by development finance institutions such as Oikocredit. Like its predecessor, REAF I, the fund taps into the growing popularity of renewable energy investments in Asia.

On the one hand, the region is experiencing increasing demand for electricity, while on the other hand there is a sense of urgency about moves aimed at shifting away from fossil fuels.

REAF II will make equity investments in on-grid solar, wind, waste-to-energy and hydropower projects of between 5 and 100 MW in India, the Philippines and Indonesia.

REAF II can bridge the gap between local developers and international investors looking for renewable energy projects in Southeast Asia.

This investment is expected to generate interesting future investment opportunities for Oikocredit in the renewable energy market in Southeast Asia.

Renewable Energy Asia Fund II has been an Oikocredit partner since 2016.
