

Cygni Energy Pvt. Ltd

Solar energy solutions for off-grid areas in rural India

 INDIA

 Green  Renewable energy  Rural

Cygni Energy Pvt. Ltd (Cygni) designs, manufactures and sells solar DC power backup solutions for rural homes and urban consumers. The company also offers rooftop solar solutions and manages large-scale solar projects.

More than 300 million Indians have no access to electricity and a large majority of them live in rural areas. These households depend on, for example, kerosene for lighting and diesel generators for electricity. Decentralised renewable energy sources, and solar in particular, are a valid alternative in these areas, which are unlikely to be connected to the grid soon.

Cygni is headquartered in Hyderabad and operates in a number of states, including Rajasthan, Telangana, Tamilnadu and Assam. In addition to an in-house research and development (R&D) team, the company has a factory producing solar DC systems.

By offering affordable access to energy, Cygni positively impacts the lives of thousands of people in remote rural regions. Finally, access to energy also helps promote and improve gender equality, women empowerment, productivity, public safety, education, and health care services.

Cygni Energy Pvt. Ltd has been an Oikocredit partner since 2017.
